

## **For CareerVerse Mobile App, I would recommend this documentation structure:**

### **Volume 1 – Mobile Product Requirements Document (PRD)**

- Cover Page
- Version History
- Executive Summary
- Product Vision
- Product Goals
- Problem Statement
- Solution Overview
- Business Objectives
- Target Users
- App Features
- MVP Scope
- Future Scope
- Success Metrics
- Risks
- Roadmap

### **Volume 2 – Mobile UX & Navigation Document**

This is one of the most important documents.

Contents:

- App Navigation Map
- Bottom Navigation
- Stack Navigation
- Modal Flow
- Deep Links
- Authentication Flow
- Onboarding Flow
- Back Navigation Rules
- Gesture Navigation
- Notification Navigation

Example:

Splash

Onboarding

Login / Sign Up

Home

Career Selection

Company Selection

Simulation Home

Mission

Mission Result

AI Feedback

Career Report

Portfolio

Profile

## **Volume 3 – Mobile Screen Specifications**

Every mobile screen gets its own section.

For each screen include:

- Screen Purpose
- UI Layout
- Components
- Buttons
- Input Fields
- Bottom Sheet
- App Bar
- FAB (if applicable)
- Validation
- Loading State
- Empty State
- Error State
- Offline State
- Success State
- API Calls
- Navigation
- Accessibility
- Tablet Behavior

Examples:

- Splash Screen
- Welcome
- Login
- OTP Verification
- Dashboard
- Career List
- Company Selection
- Simulation Inbox
- Mission Screen
- AI Feedback
- Career Report
- Portfolio
- Notifications
- Profile
- Settings

## Volume 4 – Mobile User Flow

Separate flow diagrams for:

- Registration
- Login
- Password Reset
- Career Selection
- Company Selection
- Mission Progress
- Resume Mission
- Portfolio Download
- Payment
- Profile Update

Each flow includes:

- Happy Path
- Error Path
- Offline Path

## Volume 5 – User Stories

Example:

**As a first-time user**, I want onboarding screens so that I understand how the app works.

**As a student**, I want to choose a career so that I can experience realistic workplace simulations.

**As a learner**, I want my mission progress saved automatically so that I can continue later.

Each story includes:

- Priority
- Acceptance Criteria
- Story Points

## **Volume 6 – Mobile Information Architecture**

App structure.

Home

## **Volume 7 – Mobile Design System**

- Color Palette
- Typography
- Buttons
- Cards
- Input Fields
- Progress Indicators
- Bottom Sheets
- Dialogs
- Toast Messages
- Snackbars
- Icons
- Navigation Bar
- Dark Mode
- Light Mode
- Animation Guidelines

## **Volume 8 – Technical Architecture**

Includes:

- Mobile App Architecture (MVVM, Clean Architecture, etc.)
- State Management
- Repository Pattern
- API Layer
- AI Layer
- Local Storage
- Cache Strategy
- Background Tasks
- Push Notification Flow
- Analytics

## **Volume 9 – Technology Stack**

Example:

### **Mobile App**

- React native

### **Backend**

- Node.js + NestJS (or Express)

### **Database**

- Supabase PostgreSQL

### **Authentication**

- Supabase Auth

### **Storage**

- Cloudflare R2

### **AI**

- OpenAI API

### **Push Notifications**

- Firebase Cloud Messaging (FCM)

### **Analytics**

- Firebase Analytics or PostHog

### **Crash Reporting**

- Firebase Crashlytics or Sentry

## **Volume 10 – Database Design**

Tables such as:

- Users
- Careers
- Company Types
- Simulations
- Missions

- Mission Progress
- AI Feedback
- Reports
- Portfolio
- Payments

Include:

- Relationships
- Constraints
- ER Diagram

## **Volume 11 – API Documentation**

Document every API:

- Request
  - Response
  - Headers
  - Authentication
  - Error Codes
  - Examples
- 

## **Volume 12 – Career Simulation Design**

This is your product's unique document.

For every career:

- Overview
- Company Types (Startup, Mid-size, Enterprise)
- Simulation Timeline
- Daily Tasks
- Work Inbox
- AI Manager Conversations
- Deliverables
- Evaluation Rules
- Final Report

## **Volume 13 – Admin Panel Specification**

Admin features:

- Career Management
- Mission Builder
- AI Prompt Management
- User Management
- Analytics
- Payments
- Reports

## **Volume 14 – QA & Testing**

- Unit Testing
- Widget/UI Testing
- Integration Testing
- Device Compatibility
- Offline Testing
- Performance Testing
- Accessibility Testing
- Security Testing

## **Volume 15 – Deployment**

- Android Build Process
- iOS Build Process
- Play Store Release
- App Store Release
- Versioning
- Rollback Plan
- Monitoring

## **Additional Mobile-Specific Sections**

Because this is a mobile app, I'd also include:

- Device Permissions (Notifications, Storage)
- Offline Mode & Sync
- Push Notification Strategy
- Session Management
- Deep Linking

- App Lifecycle Handling
- Orientation Support
- Performance Targets (startup time, memory usage)
- Accessibility (TalkBack/VoiceOver)
- Minimum OS Versions

These topics usually don't appear in website documentation but are expected in professional mobile app specifications.
